

Industrial and special machine construction

Together for the best solution!

For more than 30 years, ACM have been offering customised complete solutions in various industrial sectors. We accompany our customers with expertise, know-how and new perspectives throughout the full course of the project.

To strengthen our team, we are looking to recruit a

ENGINEERING DRAFTSMAN

(m/f/d)

Essential duties and key responsibilities:

- Technical monitoring from A to Z
- Processing of complex assemblies
- Re-design existing components and modules
- Drawing up of 2D and 3D manufacturing plans
- Preparation of parts lists and documentation
- Request for quotes
- Interface between customers and production

Required experience and skills:

- Completed education as a technical draftsman or professional experience as a metal worker
- PC literate: MS Office, Inventor or Autocad
- Fluent German and French are essential
- Able to work independently and quality-consciously
- Strong organisational skills and solution-oriented approach
- High level of commitment, flexibility and enthusiasm for mechanical engineering

We offer:

- A full-time job with an attractive salary according to your expertise in a dynamic team
- You will work in a modern environment with further training opportunities and flexible working hours
- An excellent working atmosphere, helpful and committed colleagues as well as a varied job in different industry sectors

Apply now. We look forward to receiving your complete application documents. Please state your salary expectations and the expected start date.
